Start at: Reference 025515 (line 02 and 0.5 across, line 51 and 0.5 up)

Plot the following references, join them up in sequence with drawn lines, and see what you get.

The question is 'How many sides does the object have?'

Create 3 objects as follows, to give you a 3 dimensional object?

Join 025515 to 025545, join that to 055545, join that to 055515, and join that back to 025515.

Join 025515 to 025545, join that to 055545, join that to 055515, and join that back to 025515

Then join 025545 to 045555, join that to 065555, and join that to 055545

Then join 065555 to 065525, and join that to 055515
